

IMMEDIATE THREAT SITUATION REPORT REQUIREMENTS

DTSC's approval is not required prior to mitigation of an immediate threat and an emergency permit will NOT be issued. However, as soon as the situation allows, and within 5 days of the resolution of the immediate threat, the emergency coordinator must notify all interested parties, and submit to DTSC the following information:

- A.** The contact person and telephone number.
- B.** A description of the situation and how it was handled.
- C.** A description of the waste, including how the waste was generated, and a brief explanation of what made the situation an emergency.
- D.** A dated sample of the notice that was mailed or otherwise distributed to nearby residents, businesses and other interested parties, providing the information in A, B and C, above, and a list of those to whom it was sent.

The immediate threat situation report can be submitted to DTSC electronically at emer_permit@dtsc.ca.gov. Mail documents to:

Department of Toxic Substances Control
Permitting: Immediate Response/ Emergency Permits
Sacramento Regional Office
8800 Cal Center Drive
